SIMPLE AND EASY TO USE

Air cleaner with snorkel helps prevent intake of soil, sand and dust

Located high and close to the handle, the snorkel intake of the air cleaner helps prevent the intake of soil, sand and dust set in motion by the blade.

Cutting height easily adjusted

A single lever adjusts the height of all four wheels at once so you can easily change cutting height to match the terrain.

Housing designed to powerfully transfer cuttings to the grass bag

The specially shaped housing uses the airflows produced by the blade to powerfully transfer cuttings to the grass bag. This action thoroughly packs the large grass bag, causing it to hold an even greater amount of cuttings.

HRJ216K3

Self-propelled mower

Cutting width
530
mm

Grass bag
70 L

HRJ196

Push mower

Cutting width
470
mm

Grass bag
60 L

Self-propelled for quick, easy mowing

The engine powers both the blade and wheels for extremely smooth mowing. Choose from three forward speeds. (for HRJ216K3 only)

Two control levers

The simple design features two control levers: one for forward speed and one for engine rpm. Releasing the handle grip stops both forward motion and blade rotation.
