*Please refer to the manual for details.

Excellent usability and cost performance

Workability

Width is narrowed and the center of gravity is positioned higher.

Head clearance.

Configuration that places the center of gravity forward
Shape that fits with the shoulder and reduces load

Handling

Big tank cap

- For easier opening/closing and filling
- For simpler installation and removal

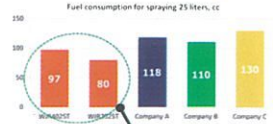

Handles

- Located on both sides of the tank's lower body for easy lifting.

Operation box

- Independent from the shoulder belt for more efficient operation.

Fuel Efficiency

Equipped with mini 4-stroke Honda GX25/35 engine

Detachable nozzle holder

- The nozzle and hose, which gets in the way when moving, can be contained neatly.
